Overview

Armin Popp focuses his practice on data protection, artificial intelligence and legal tech in addition to employment law.

After passing the bar exam in May 2022, Armin attended the postgraduate master's program, Digital Business & Tech Law LL.M., at MCI Innsbruck to deepen his skills and knowledge of the digitalization of the working world and new technologies.

Armin studied law at the University of Vienna. After graduating, he worked for two years at the Federal Ministry of the Interior, where he discovered his fascination and interest in information technology. However, since his great passion was always employment law, the next step in his career was to join one of the most renowned employment law firms in Austria, where he worked for four years as an associate.
